

Assembly Instructions for Ottoman Gas Lift

1

Step1

Locate the bases within the desired room. and remove all the packaging.

Step2

Place the base(s) on their side so that you can see the underside of the bed (fig.1)

Step3

If feet need to be fitted to the bases.do this now (the feet are inside the base)

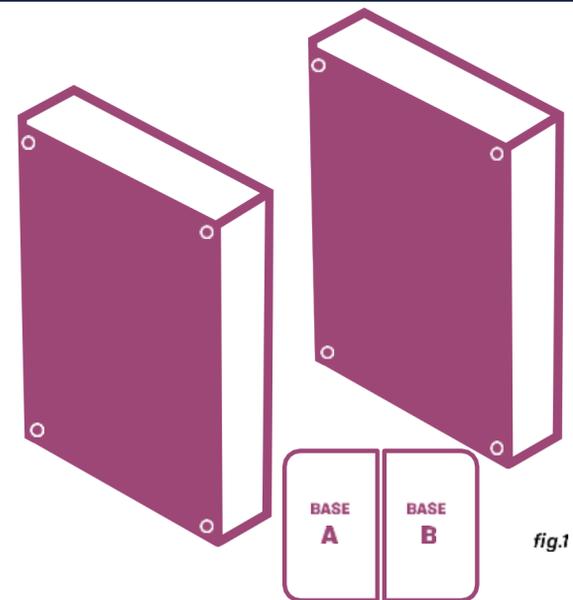

Step4

Align the first base in it's desired position in the room

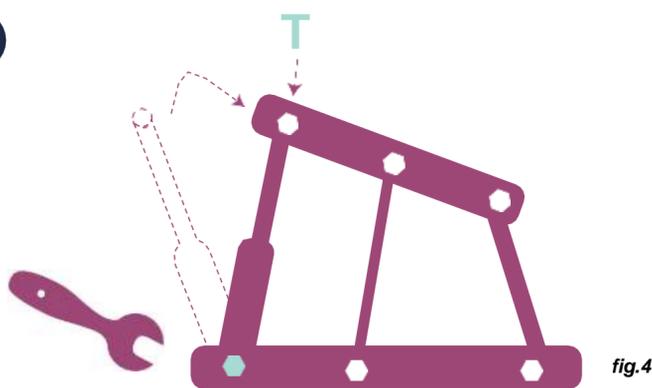

Steps

Repeat with the second base (ensure the round corners are on the outside)

NOTE: Small single /Single bed comes with 1 base

2

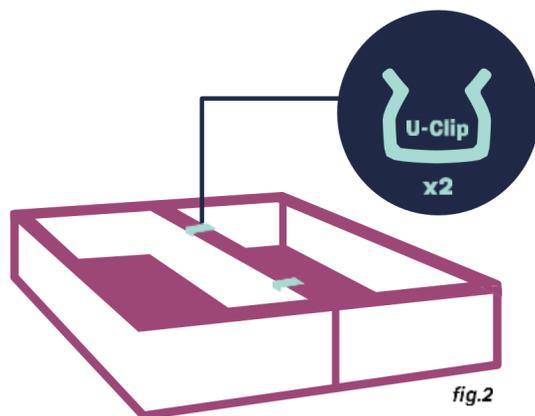

Step6

Once the ottomans are open. place the bolts on the pistons. as shown in diagram /fig.4J

Step?

Please **tighten** the bolts but don't over tighten to set the required opening resistance.

3

Step 8

Place the "U-clips" /fig.2J (see diagram) and locate the clips on to the bases of the units in illustrated location. then place the units the right way up on their feet.

Step 9

With help. position the units in the desired location and in the desired orientation in terms of the Ottoman opening direction.

4

Step 8

Locate MB Bolt & Screw it to the side of the lift /fig.:JJ

End opening see (fig.3a)

Step 9

Choose which side you want the headboard and place the Screw. (fig.3/

End opening see (fig.3a)

Step 9a

For side opening Headboard spacers needs to be in between headboard & bed base /fig.:JJ
